MEGA HIRING DRIVE for FRESHERS – 31 AUG 2024

We are excited to announce multiple openings for freshers in our organization. This is a fantastic opportunity to kickstart your career in the IT industry and become an integral part of our Generative AI-driven company.

Please review the required and mandatory skill sets, as well as our expectations, in the document provided below. We encourage you to apply for the roles that align with your interests and competencies.

Positions and Skillsets:

Role	Skill Sets
Automation Engineer	Selenium with Python or Java	Data Engineer Concepts	GenAI Concepts	ETL Testing
Data Engineer	Python	Data warehousing & Data Engineering concepts	SQL	Cloud Platform Exposure
DevOps Engineer	CI/CD	Cloud Platform	Database Management	Scripting (Shell, Python, YAML)
Digital ML Engineer	Python	Javascript	Database	Mobile application Concepts	Angular or React	Node
DotNet Developer	C#	DotNet	SQL	Added Advantage - Web API, Entity Framework, .NET Core, Angular
PLSQL Developer	SQL & Relational Database Concepts	PL/SQL	Oracle, SQL Server / MySQL
HR Associate	End to End Recruitment	Onboarding	Candidate Experience	Designing	Content Writing
Sales Development Representative	Lead Generation	Market Research	Email Campaigns	Excellent Communication	Continuous Learning	Basic IT Sales idea & Mindset

Automation Test Engineer / Data Test Engineer

- Collaborate with cross-functional teams to understand project requirements and design, develop, and maintain automated test scripts.
- Strong exposure in Python for data manipulation, ETL processes with testing exposure.
- Basic understanding in designing, implementing, and managing data warehouses.
- Good exposure in Data Engineering and testing concepts equivalent to ETL & Data testing.
- Learn and use GenAI tools for testing purposes.
- Stay up to date with industry trends in test automation and data testing practices.
- Should be excellent in communication & ability to handle multiple tasks simultaneously

Data Engineer

- Strong exposure in Python for data manipulation, ETL processes, and automation.
- Basic understanding in designing, implementing, and managing data warehouses.
- Solid understanding of data modelling, ETL pipeline and data architecture best practices.
- Exposure to SQL skills for querying, data analysis, and database management.
- Exposure towards cloud platforms (AWS or Azure).

DevOps Engineer

- Basic understanding of DevOps concepts, including CI/CD, version control & containerization.
- Must have basic Python skills and have good understanding in Linux/Unix/Windows OS.
- Exposure to cloud platform such as AWS and Azure & with IAC concepts.
- Eagerness to learn and adapt to new tools and technologies related to Devops.
- Eager to learn coding skills (Python, Shell Scripting, YAML) and database management.
- Excellent communication skills and the ability to work collaboratively in a team.

Digital ML Engineer

- Strong exposure in Javascript, HTML, CSS & proficient in Python.
- Good exposure and understanding towards data structures & algorithms.
- Technical Versatility towards any one of the frameworks or Languages such as React JS & Node JS & Django/Flask, Swift or Kotlin or Flutter.
- Good to have exposure in ML concepts such as PyTorch, TensorRT, OpenAI API.
- Strong command of SQL and sound knowledge in database concepts.
- Excellent communication & teamwork abilities with eagerness to learn and adapt to new technologies.

DotNet Developer

- Candidates with strong knowledge in OOPS.
- Should have a basic background in .NET Framework/.NET CORE, C# and Entity Framework
- Knowledge about REST API, Json and Database.
- Excellent communication, and intrinsically motivated to learn new skills.
- Academic projects in .Net Technologies are a plus.

PLSQL Developer

- Collaborate with developers to develop, test, and maintain SQL queries and PL/SQL code.
- Work with cross-functional teams to gather requirements and contribute to project development.
- Participate in database design discussions, providing insights on schema and optimization.
- Support database performance optimization through query tuning and indexing strategies.
- Assist in identifying and resolving database issues, learning troubleshooting skills.
- Document code changes, processes, and technical specifications for clear team communication.

HR Associate

- Manage the full recruitment cycle from job posting to candidate selection.
- Facilitate a smooth onboarding process, guiding new hires through orientation.
- Enhance the overall candidate experience ensuring a positive recruitment journey.
- Prepare and maintain accurate HR reports and documentation.
- Must have exposure towards poster designing and content writing.
- Excellent communication and people management skills.
